

2.4.15 Grafy relací s absolutními hodnotami

Př. 1: Nakresli graf relace

$$L_1 = \{[x, y] \in \mathbb{R} \times \mathbb{R}; y \leq -|x+1|\}.$$

Př. 2: Nakresli graf relace

$$L_2 = \{[x, y] \in \mathbb{R} \times \mathbb{R}; y \geq |x+1| - x\}.$$

Př. 3: Nakresli graf relace

$$L_3 = \{[x, y] \in \mathbb{R} \times \mathbb{R}; |y| > |x|\}.$$

1) $y \in (-\infty; 0)$

$$y < 0 \Rightarrow |y| = -y$$

$$-y > |x| \Rightarrow y < -|x|$$

2) $y \in (0; \infty)$

$$y > 0 \Rightarrow |y| = y$$

$$y > |x|$$

Př. 4: Nakresli graf relace

$$L_4 = \{[x, y] \in \mathbb{R} \times \mathbb{R}; |x-1| + |y| \geq 4\}.$$

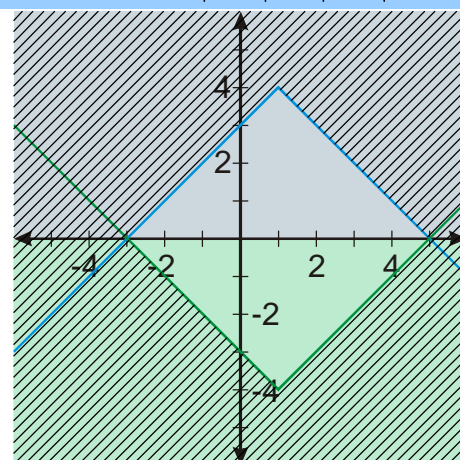

1) $y \in (-\infty; 0)$

$$y < 0 \Rightarrow |y| = -y \quad y \leq |x-1| - 4$$

2) $y \in (0; \infty)$

$$y > 0 \Rightarrow |y| = y$$

$$y \geq 4 - |x-1| = -|x-1| + 4$$

Př. 5: Nakresli graf relace $L_5 = \{[x, y] \in R \times R; |x+1| + 2|y-2| \leq 4\}$. Ještě před začátkem řešení odhadni výsledek.

1) $y \in (-\infty; 2)$ $y-2 < 0 \Rightarrow |y-2| = -y+2$ $y \geq \frac{1}{2}|x+1|$

2) $y \in \langle 2; \infty)$ $y-2 > 0 \Rightarrow |y-2| = y-2$ $y \leq 4 - \frac{1}{2}|x+1|$

Př. 6: Nakresli graf relace $L_6 = \{[x, y] \in R \times R; |y-1| + y + |x+2| - 2x - 7 \geq 0\}$.

1) $x \in (-\infty; -2) \wedge y \in (-\infty; 1)$ $x \leq -\frac{8}{3}$

2) $x \in (-\infty; -2) \wedge y \in \langle 1; \infty)$ $y \geq \frac{3}{2}x + 5$

3) $x \in \langle -2; \infty) \wedge y \in (-\infty; 1)$ $x \leq -4$

4) $x \in \langle -2; \infty) \wedge y \in \langle 1; \infty)$ $y \geq \frac{x}{2} + 3$
